### **CME Credits** (see page 18)

#### **IDKD Course:**

Swiss Society of Radiology: 36 category 1 points

EACCME: 33 hours of European external CME credits

#### **Kangaroo Course:**

Swiss Society of Pediatric Radiology: 10 category 1 points Et Sunday Lectures 2 category 1 points

Swiss Society of Radiology: 5 category 1 points

EACCME: 4 hours of European external CME credits

#### **Diamond Course:**

Swiss Society of Nuclear Medicine: 12 category 1 points

Swiss Society of Radiology: 10 category 1 points

EACCME: 7 hours of European external CME credits

## General Concept

### **IDKD**

The International Diagnostic Course in Davos, IDKD, is an organ-based annual postgraduate course with a yearly changing topic.

### **Lectures on "Hot Topics" and Diagnostic Dilemmas**

An Annual Oration is presented on Sunday. Highlight lectures are presented daily by senior experts and provide an overview of "hot topics", new developments or political issues in radiology and associated sciences.

### **Workshops**

The participants will attend 20 of 21 different workshops covering the medical imaging approach to the diagnosis of the diseases of the Abdomen and Pelvis. Furthermore, interventional techniques will be discussed. The instruction will be in groups of approximately 50 participants. Each class room is equipped with a sufficient number of computers, on which individual viewing of the cases in groups of 2-3 students is possible. Typically, a workshop consists of introductory remarks by the teacher, self-study of the case material for 15-30 minutes and discussion of the cases with the teacher in the remaining time. The case viewing is supported by a special software, uniquely developed for IDKD and drawing from the extensive expertise with electronic teaching accumulated by IDKD over the last years.

### **Film Reading Panel**

Diagnostic competition open to all participants and teachers, based on selected cases. Answers have to be handed in Wednesday by noon prior to the film reading session. Prizes will be awarded to the participants with the best answers. We assume that answering the quiz is an individual accomplishment and reserve to exclude very similar answers from the competition.

### **Course Syllabus**

The Syllabus is included in the registration fee.

### **IDKD online cases**

IDKD offers access to two well documented cases per teacher on the IDKD online database. Each participant receives a unique login (user/password) to access the database.

### **Exhibition**

Booths of selected imaging industries and one book seller.

### **Course and Teacher Evaluation**

IDKD has two different types of course evaluations. Please use the online evaluation system provided on the classroom computers for teacher ratings. There is also a paper-based evaluation form for plenary lectures and organisational aspects of IDKD. You will find this form in the congress bag. We kindly ask you to return it at the end of the meeting.

### **Pediatric Radiology Satellite Course "Kangaroo"**

Four workshops on specific aspects of Pediatric Imaging.

### **Nuclear Medicine Satellite Course "Diamond"**

Eight workshops on Nuclear Medicine.

# Travel Arrangements

Swiss International Air Lines is proud to be the Official Carrier for the **IDKD – International Diagnostic Course Davos and the Satellite Courses "Diamond" and "Kangaroo", March 20 – March 26, 2010** and is offering special Congress fares to all participants. These Congress fares offer reductions of up to 25% depending on the fare type, route and space availability.

Congress fares are valid on the entire SWISS route network for flights to Switzerland, including flights operated by partner airlines under an LX flight number. These fares are now bookable for the travel period 14 days prior to and 14 days after the event.

To take advantage of this offer, book easily and conveniently through [WWW.SWISS.COM/EVENT](http://WWW.SWISS.COM/EVENT), enter your email address and the following event code: 1125 5021 9259 7285

The special SWISS congress fare is marked with a "C". It may not necessarily be the lowest fare but it offers flexibility in the event of rebooking or cancellation.

SWISS looks forward to pampering you on board with typical Swiss hospitality.

## CME Accreditation

IDKD has introduced a new system for CME credit confirmation which is based on the classroom computers. Participants will have to log in for each workshop in order to receive the proper credits.

In addition a separate confirmation of participation will be issued.

### IDKD

The IDKD is accredited by the European Accreditation Council for Continuing Medical Education (EACCME) to provide the following CME activity for the medical specialists. The EACCME is an institution of the European Union of Medical Specialists (UEMS), [www.uems.net](http://www.uems.net).

The IDKD is designated for a maximum of **33 hours of European external CME credits**.

Each medical specialist should claim only those hours of credit that he/she actually spent in the educational activity.

EACCME credits are recognized by the American Medical Association towards the Physician's Recognition Award (PRA). To convert EACCME credit to AMA PRA category 1 credit, contact the AMA.

The Swiss Society of Radiology (SGR-SSR) designates the IDKD Course with **36 category 1 points**.

The Deutsche Röntgen Gesellschaft (DRG) designates the IDKD Course with **36 category 1 points**.

**Akademie**  
für Fort- und Weiterbildung in der

A young child with dark hair, wearing a bright yellow t-shirt, is looking through a large, white sculpture of a whale skeleton. The sculpture is made of many long, curved ribs that form a tunnel-like structure. The child is on the left side, looking towards the center of the tunnel. The background shows a grassy area and some trees under a clear blue sky.

Erstmals ist es jetzt möglich, den kompletten Brustkorb in weniger als einer Sekunde zu scannen; für ein Herz braucht man sogar nur ein Viertel dieser Zeit. Und obwohl die Aufnahmen bis in die kleinsten Verästelungen der Blutgefäße präzise sind, ist die Strahlendosis deutlich geringer als bei herkömmlichen Scanmethoden. Dank dieser revolutionären Technologie werden CT-Untersuchungen für Patienten schneller, einfacher und sicherer.
