

Information for the participants bringing their own laptops to Davos

Please note that there will be neither rental laptops, individual repairs, IT support service, nor storage provided by IDKD. Participants will be responsible for the security of their laptops at all times.

220 V electric outlets will be provided in the classrooms. Please note that you might need an adaptor for your laptop power cable in order to use these outlets. IDKD will not provide any adaptors onsite.

The following standard Swiss electric socket will be installed:

Type J" SEV 1011 / "T13" (with three recessed pinholes, example shown in the pictures below).

The German / French / Austrian plugs with thicker pins (diameter 4.8 mm [1/5 inch]) and Italian plugs with three thin pins in a row are not compatible with standard Swiss wall outlets (Pin diameter 4.0 mm), despite of the equal distance of their two main pins. (Left picture).

Kindly note that the pinholes are at a deeper level of the outlet, as shown in the pictures.
