

"Fundamentals in Imaging: From Head to Toe" Saturday, March 30, 2019

Course Objectives:

- Overview of diagnostic imaging essentials in all body areas („Head to Toe“)
- Review and a refresher for residents, especially when preparing their Board exam
- Information on the state-of-the-art findings in diagnostic imaging as knowledge update

Target Audience:

- Residents preparing for Board examination
- Certified Radiologists looking for an up-to-date concentrated brush-up
- Clinicians looking for an overview of current knowledge in imaging

		Last Name	First Name	Country	Topic
9.15-9.30	Opening				
9.30-9.55	Lecture 1	Stippich	Christoph	Switzerland	Brain Tumor Imaging: Standards and Advanced Techniques
10.00-10.25	Lecture 2	Elicker	Brett	USA	Radiology of the Intensive Care Unit
10.30-10.55	Lecture 3	Stuckmann	Gerhard	Switzerland	Ultrasound: Diagnoses Not To Miss During Night Shifts
11.00-11.30	Coffee				
11.30-11.55	Lecture 4	Abbott	Gerald	USA	Signs in Chest Radiology: Edema, Atelectasis, Consolidation
12.00-12.25	Lecture 5	Ketai	Loren	USA	Pulmonary Infections
12.30-12.55	Lecture 6	Pinker-Domenig	Katja	USA	The BI-RADS Lexicon – All You Need To Know
13.00-14.00	Lunch				
14.00-14.25	Lecture 7	Thoeny	Harriet	Switzerland	Differential Diagnosis of Focal Renal Masses
14.30-14.55	Lecture 8	Hausmann	Daniel	Switzerland	Rectal MRI for Staging and Response Assessment – Current Concepts and Future Trends
15.00-15.25	Lecture 9	Donati	Olivio	Switzerland	Prostate Imaging: A Recipe to Success
15.30-16.00	Coffee				
16.00-16.25	Lecture 10	Huisman	Thierry	USA	Radiological Synopsis of Child Abuse
16.30-16.55	Lecture 11	Teh	James	UK	Systematic Evaluation of Standard Radiographs in MSK
17.00-17.25	Lecture 12	Becce	Fabio	Switzerland	10 Musculoskeletal Diagnoses You Should Not Miss in the Emergency Room
17.30-18.00	Lecture 13	Klein	Jeffrey	USA	How to Use RadioGraphics for Radiology Resident Education
