

Information on Certificates and Course Evaluation

Dear Participant,

Please note that you will receive a general confirmation of attendance. In addition you will also have the opportunity to get individual CME credits for those sessions that you actually attended.

How to obtain individual CME credits for the attended sessions

In order to claim credits for sessions that you attended, please book those sessions on [CME Credits](#) Page. Link at the bottom of the www.idkd.org page below the Future Courses

Course	Topic	Dates
50th IDKD Davos 2018	Diseases of the Abdomen and Pelvis	March 25 – 29, 2018

How to validate your attendance at the workshop or lecture

- In order to obtain the CME certificate, please confirm your attended workshops and lectures, as follows:
- Please select the course from the drop down menu below. Once you have selected a course, a list of the course workshops for a particular day will be displayed.
 - To confirm your workshop attendance, please click on the desired checkbox.
 - Once you have selected a workshop, all other workshops during the same time period are disabled, because you can not attend several sessions at the same time.
 - You can change the course date in order to display workshops for another day. Please note that obtaining CME in advance is not permitted.
 - **Your selection can be changed till Sunday, April 15th 2018 23:59:59 (Central European Time, CET).**

Course and Teacher evaluation

The IDKD is continuously investing into organisation, e-facilities and teaching. Your evaluations and comments play a major role in planning of the next years' program and therefore are very much needed and appreciated.

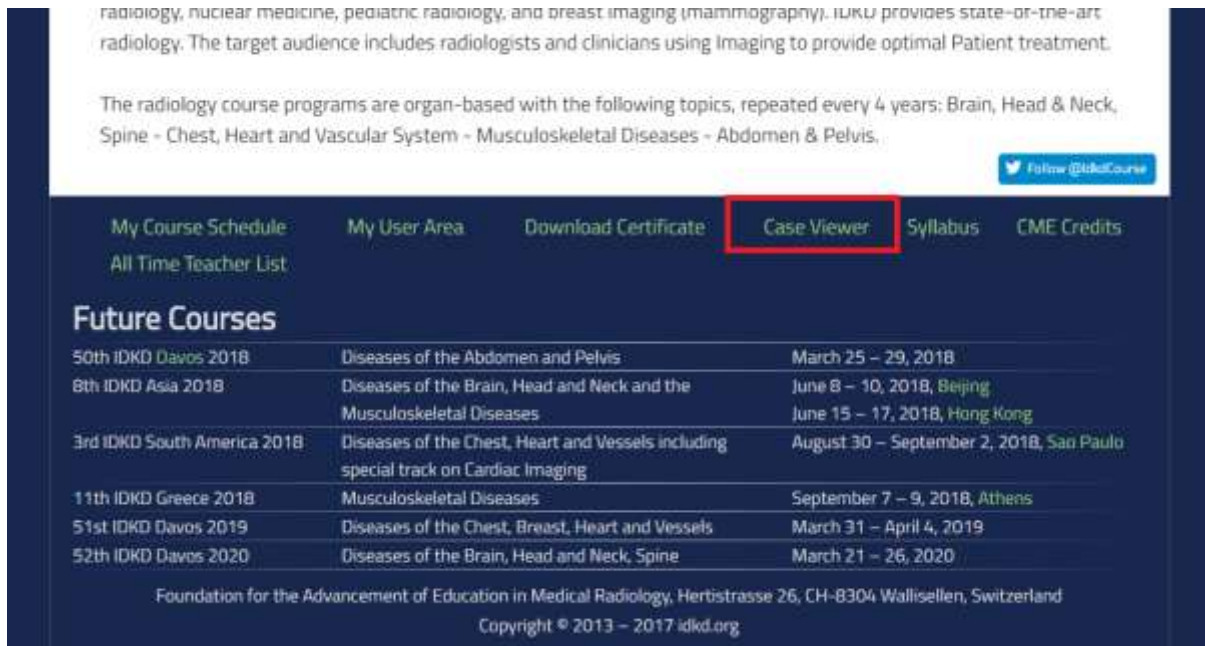

You would be able to access the evaluation system in Davos via <http://evaluation.idkd.org> by using your login data provided on your badge.

Thank you for your cooperation.

If you need further help, please come to the Registration desk or after the course, please contact us on <mailto:info@idkd.org>

Cases

Cases for the IDKD and Case Library for the “Fundamentals in Imaging” course can be found under Case Viewer:

radiology, nuclear medicine, pediatric radiology, and breast imaging (mammography). IDKD provides state-of-the-art radiology. The target audience includes radiologists and clinicians using imaging to provide optimal Patient treatment.

The radiology course programs are organ-based with the following topics, repeated every 4 years: Brain, Head & Neck, Spine - Chest, Heart and Vascular System - Musculoskeletal Diseases - Abdomen & Pelvis.
